

# POSISEP® HEMOSTAT POSISEP®X HEMOSTAT DRESSING/INTRANASAL SPLINT

## Different Platforms for Your Individual Needs

Recognizing that each surgeon's preferences and the anatomy of each patient's sinuses are not identical, Hemostasis has developed multiple platforms of our PosiSep® hemostat sinus splints to meet those varying needs.

### BENEFITS

- Offers easier placement with a superior field of view.
- Dissolves naturally by way of gentle irrigation and aspiration. Easily conforms to the nasal cavity.
- No special storage or refrigeration required.
- Biocompatible – made of naturally occurring chitosan polymers
- Immediate expansion upon hydration

PosiSep® Hemostat Dressings/Intranasal Splints and PosiSep®X Hemostat Dressings/Intranasal Splints are indicated for use in patients undergoing nasal/sinus surgery as a space occupying splint and hemostat to:

- Separate tissue or structures compromised by surgical trauma;
- Separate and prevent adhesions between mucosal surfaces during mesothelial cell regeneration in the nasal cavity;
- Help control minimal bleeding following surgery or trauma;
- Help control minimal bleeding following surgery or nasal trauma by tamponade effect, blood absorption and platelet aggregation; and
- Act as an adjunct to aid in the natural healing process.

- PosiSep is intended for use under the direction of a licensed healthcare provider.

**For detailed information regarding indications for use, warnings and precautions, see Instructions for Use.**

PosiSep® is indicated for use as a nasal hemostat to treat epistaxis. PosiSep X is indicated for use as a nasal hemostat to treat epistaxis.

- Biocompatible – made of chitosan-based polymers
- Minimizes bleeding and edema after surgery
- Foam easily conforms to nasal anatomy
- Easy to apply – no mixing or additional prep time necessary
- Dissolves naturally or can be easily removed with gentle irrigation and aspiration
- No special storage or refrigeration required.
