

Integra[®] MicroFrance[®] Instrumentation

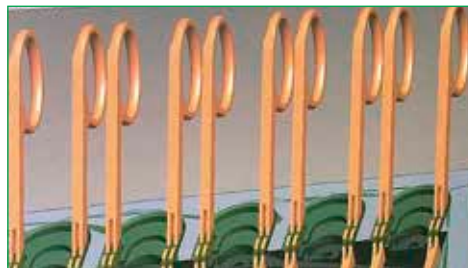

Restoring patient health: this common goal inspires the partnership between renowned ENT surgeons and Integra MicroFrance engineers. It drives us to achieve the highest quality and innovation, the perfect integration of form and function. It's why we do what we do.

Integra® MicroFrance® ENT Instruments

The **MicroFrance® brand** is a premier line of ENT instruments known for exceptional quality, precision, and durability.

MicroFrance engineers collaborate with renowned ENT surgeons, innovating to develop new instruments and surgical techniques that improve patients' lives. With a true understanding of your expectations, many years of experience, and a dedication to fine craftsmanship, MicroFrance technicians transform the functional into the exceptional.

The MicroFrance Difference

You'll know the difference when you use a MicroFrance instrument because of its unique feel and touch due to the way all of its components work together. The MicroFrance brand surpasses other instruments through an unwavering commitment to quality and precise craftsmanship. A rigorous standard of quality control is implemented from beginning to end.

1. Design and Engineering.

Every instrument component is carefully designed in response to your needs and expectations as a surgeon. An instrument is created not for its own sake, but only because it fulfills surgeons' needs.

2. Training, Skill, and Experience of Technicians.

MicroFrance technicians are masters of their craft, possessing numerous years of experience.

3. Microscopic Hand-Finishing and Sculpting.

Fine adjustment by hand occurs throughout manufacturing to ensure that all components fit together accurately. This custom fit distinguishes MicroFrance instruments from the mass-produced variety.

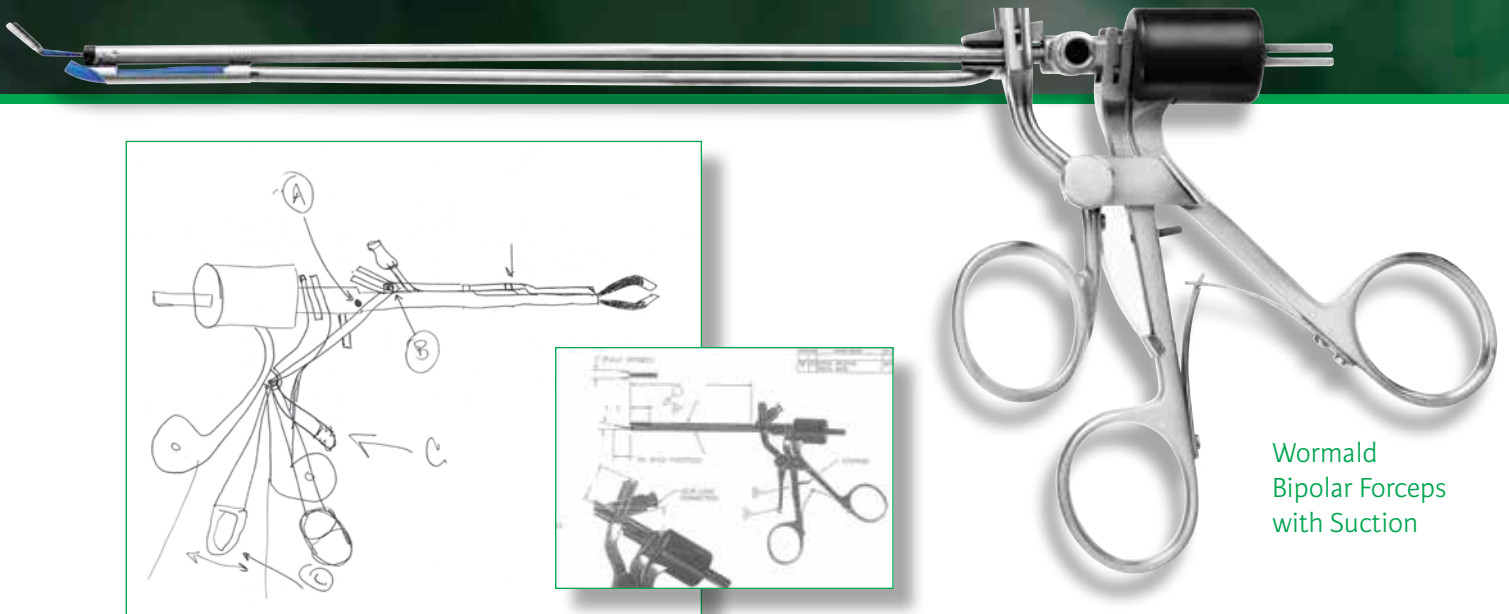

4. 100% Inspected.

Every MicroFrance instrument is inspected for quality, accurate specifications, and the custom fit of each component.

Redefine: Form and Function

“MicroFrance is unique in its ability to allow surgeons to design innovative instruments, which in turn allows other surgeons to benefit from their innovative approach. In the suction bipolar forceps, the suction and bipolar have been cleverly integrated to facilitate use in closed cavities such as the nose and sinuses.”

— Peter John Wormald, MD, FRACS, Professor of Otolaryngology-Head and Neck Surgery
Adelaide and Flinders Universities, Adelaide, Australia

History of MicroFrance Instruments

For more than 35 years, MicroFrance instruments have exceeded the expectations of ENT surgeons around the world. MicroFrance was founded as a company in 1970 and soon gained a reputation for premier quality and innovation. Xomed acquired MicroFrance in 1998, was purchased by Medtronic in 1999, and then acquired by Integra in 2014. Integra is committed to maintaining the tradition of excellence that you know and expect from the MicroFrance brand.

Quality Crafted for a Precise Cut

By providing a fast, clean and precise cut, MicroFrance Instruments may help to mitigate tissue trauma and mucosa damage by offering optimal cutting function.

An Inspired Collaboration

MicroFrance has been extremely responsive in helping to refine and implement new microsurgical instrument designs. I have been particularly pleased with the quality of the instruments manufactured by MicroFrance.
